

HAND AND POWER TOOLS WORKSHEET

DIRECTIONS Write the description number next to the correct picture with the name of the tool.

1	It can be used for sharpening pencils, cutting drywall and rigid insulation, and marking for precise cuts.
2	Helps keep basic tools organized and within reach.
3	Used for accurate marking and layout since they have measurements; used as cutting guides for drywall, lumber and glass.
4	Used for cutting more wood than a utility knife, where a saw won't do.
5	Used for marking between two marks then snapped to produce a straight line for cutting or fastening.
6	These are used for spreading, either putty or for smoothing and applying drywall compound.
7	Primary tool for drilling and driving screws or fasteners.
8	Cuts mostly flat material like plywood, 2x4's, etc.
9	Used for cuts not possible with a circular saw in hard to reach areas; an essential remodeling tool.
10	There are different kinds of these: cutting wood, cutting metal, cutting wood in small openings.
